SURVEILLANCE AND STORAGE 360°

REDEFINING PRODUCT AND CHANNEL INNOVATION

With great pleasure we welcome you to the season 2 of 'Storage 360' GCC Roadshow. After successful stints in UAE and Saudi, the roadshow is back for its latest editions in Oman, Qatar and Kuwait. In the new addition, we are emphasizing further on cloud storage and surveillance and the overriding demand of the digital enterprises in satiating the demands of data storage, monitoring, consumption and security.

The event is specifically designed for the channel partners (VADs, SIs, Resellers and OEMs) to highlight the critical role played by the ecosystem in addressing the end-user demand.

Enterprise Adviser invites you to a highly customized RoundTable of storage and surveillance channel leaders. A unique mix of channel partners and customers who together are redefining the future of enterprise storage in the country. Discuss the future and business potential of mission critical, surveillance and near line drives and how they are disrupting the storage market. After all innovation is not just about a product... it is about the entire ecosystem.

AGENDA

10:30 AM	REGISTRATION AND NETWORKING
11:15 AM	WELCOME NOTE BY EDITOR AND INTRO OF ATTENDEES
11:30 AM TO 1:00 PM	INTERACTIVE SESSION ON ENTERPRISE STORAGE
